VOLKAN AKYEL

FRONTEND WEB ENGINEER

www.uikielle.com
volkan@uikielle.com
+33764397745
Paris, FR

PROFILE

With a background in engineering, I bring a creative problem-solving approach to front-end issues by debugging, testing, and maintaining web application systems. I am always looking for a way to enhance my technical knowledge as a developer within a team.

SKILLS

Tools that I am working with :

- Jira
- Yarn / NPM
- Github / Gitlab
- Jest
- Vitest
- Cypress
- Vscode
- Jira
- Sketch
- Figma

Languages & Frameworks I use :

- Javascript
  Vanilla.js with ES6
  Vue.js v2/v3
  D3.js
- Typescript
- Storybook
- Nuxt.js v2/v3
- Sass
- Taiwlind
- Docker
- Node.js + Express + MongoDB

COURSES

Responsive Web Design
Node.js + Express / API Design
Javascript ES6 Certification
Vue.js Certification

LANGUAGES

English - French - Turkish

WORK EXPERIENCE

Decathlon Digital
May 2023 - Present

Senior Frontend Developer

Paris - FRANCE

I led of the transition to Vue3 and Nuxt3 as well as Vite, boosting performance for sports product data research. I managed key package updates and introduced GraphQL for efficient data interaction. Additionally, I contributed to "*Vitamin*", our new design system, harmonizing Vue and React UI with Tailwind CSS for a modern, unified user experience.

Europcar Mobility Group
Mars 2021 - May 2023

Frontend Developer

Paris - FRANCE

As a Frontend Engineer, I enhanced our e-commerce platform using Vue Nuxt and TypeScript, developing a versatile *component library* to unify branding across Europcar and Goldcar. My focus on atomic design improved the customer experience and business user interfaces within our agile framework.
I led the integration of libraries like Contentful and streamlined content localization using Phrase and i18n, optimizing translations for over 27 markets.

Suade Labs
October 2020 - February 2021

Frontend Developer

London - UK

I contributed to a finance regulation dashboard, focusing on feature adaptations such as data filters and improving the global rendering. I played a key role in migrating the project from Vue2 to Vue3 using the Composition API and implement E2E testing with Mocha

INAIA Finance
September 2019 - March 2020

Fullstack Web Developer

Frankfurt - GERMANY

On an account management and financial portfolio web app, I focused on developing and testing UI logic, with a special focus on refining elements like charts and filters. My main task was to analyze and address complexities in the interaction between the frontend and backend, ensuring seamless integration and functionality.

EDUCATION

IPSSI Paris
September 2016 - July 2018

Master of Science, Software & System engineering

Thesis Topic :
Implications of automating the generation and deployment of secure tasks in production environments

IPSSI Paris Campus Montsouris
September 2014 - July 2016

Bachelor of Science, Software Engineering

Data Structure & Algorithm
System Administration
